

Mechatronic Engineer

Preferovaná země nebo město: Sweden
Plat: od 2000 EUR
Činnosti: It, internet
Úvazek: Plný úvazek
Připraven přestěhovat se: Ano

Popis životopisu

Design and maintenance of mechatronic systems and industrial robots.

Zkušenosti

01.09.2018 – Do teď

Minsk State College of Electronics.

Head of Laboratory of Industrial Electronics

Developed several courses on PLC programming (Siemens PLC 1200, 1500), Robotics programming (CIROS 6, Mitsubishi RV-2SDB, RV-2AJ) and Industrial line assembly (Festo MPS), which resulted in changing the existing mechatronics course toward more PLC and robotics oriented, and expanding the list of possible job opportunities for students. ● Taught courses on Robotics Programming on customer demand. ● Did programming of Mitsubishi's robots on customer demand. ● Programmed Human Machine Interfaces for industrial customers on demand. ● Put new equipment into operation, which expanded the list of taught specialties in the college. ● Participated in recruiting of students for college and their further development for the next WORLDSKILLS as a Judge.
